## PROFILE

Full-stack developer with 4+ years of experience building scalable web and mobile applications. Skilled in leading development teams, integrating secure payment systems, and delivering impactful software solutions that drive business growth. Passionate about creating user-friendly, efficient products that generate measurable results.

## WORK EXPERIENCE

### Software Engineer | Pevent.ng

2023 - Present

- Led a team of 3 to develop Pevent.ng, an online ticketing platform with e-voting capabilities, generating millions in revenue and handling heavy daily traffic.
- Architected the application with Next.js 13 (App Router), TypeScript, Prisma, and NoSQL, ensuring scalability and performance.
- Owned frontend and backend development, delivering seamless user experiences and robust functionality.
- Deployed with Docker for scalable infrastructure and smooth CI/CD pipelines.
- Enhanced features based on client feedback, improving customer retention and attracting new clients.

### Mobile App Developer | DailyPay

July 2025 - Current

- Co-developed DailyPay's mobile application with React Native, enhancing accessibility and user experience.
- Deployed and maintained the iOS version, ensuring stability, performance, and security.
- Implemented secure financial features to protect transactions and build user trust.

### Full-stack Developer | International School of Ministry

Jun 2022 - Jan 2025

- Built the company's first mobile application using React Native and Laravel, improving accessibility and engagement.
- Developed and launched a subscription platform and digital library, generating thousands in revenue and becoming a key growth driver.
- Integrated Stripe for global payments and the company's custom currency for seamless transactions.
- Delivered scalable, user-friendly solutions with Laravel, Tailwind, and MySQL.

## PROJECTS

### **Pevent.ng** – [pevent.ng](https://pevent.ng)

Online ticketing platform with e-voting capabilities, generating millions in revenue.

- Led a team of developers to build and maintain the platform.
- Tech stack: Next.js, TypeScript, MongoDB, Prisma, Docker, Tailwind, Shadcn, Paystack.
